1. By bidding at the auction, buyers agree to comply with the terms and conditions of the auction.
2. Prior to an auction a prospective buyer must register to bid and give their full name and permanent address and if requested, banking or other suitable references.
3. **All statements, whether made verbally or in the catalogue, are statements of opinion only and neither the auctioneers nor its employees or agents will be responsible for the accuracy of any opinion given. Each lot is sold by the seller with any and all errors of description, faults and imperfections.**
4. The auctioneer has the right to divide any lot or combine two or more lots, refuse any bid, withdraw any lot from auction or (in the case of dispute) put any lot up for auction again. The auctioneer shall have the right to advance the bidding as he may decide.
5. All lots are being sold under the auctioneers VAT margin scheme unless otherwise specifically referred to by the vendor. Those lots not sold under this scheme will be marked with ^ and VAT at the current rate may apply.

Imperfections are not stated.
7. A buyer may only bid on his own behalf, unless prior to the auction he has notified John Weldon Auctioneers of his intention to bid on the behalf of a third party, the identity of whom he must disclose to John Weldon Auctioneers. Even if a buyer buys a lot on behalf of a third party, the buyer shall remain personally responsible to John Weldon Auctioneers for that third party's obligations, including, but not limited to, the payment of the purchase price and removal of the lot following the auction.

11. Pictures displayed on the website & catalogue are not to scale
12. Failure to examine a lot/s by a buyer shall not constitute a cause for cancellation of sale.
13. Historically, many coloured gemstones have been subjected to a variety of treatments designed to enhance their appearance. Certain enhancement methods, such as heating, are routinely used to improve colour or transparency in rubies and sapphires. Other methods, such as oiling, enhance the clarity of emeralds. The international jewellery trade has generally accepted these methods. Other coloured gemstones may have undergone other permanent or semi-permanent treatments, such as dyeing, irradiation, coating and impregnation, possibly requiring further retreatment in order to retain their appearance. Prospective purchasers should assume that all gemstones will have been treated unless statements are made to the contrary. Gemmological reports from internationally recognised Gemmological Laboratories will be noted in the item description where available. Recent advancements in technology have led to some diamonds being treated in a variety of ways designed to enhance their appearance. These treatments can include fracture filling, laser drilling, irradiation and coating, and whilst all efforts are made to identify such treatments, it is not possible for us to guarantee that all lots containing diamonds/gem stones are free of these enhancements. We do not knowingly offer treated diamonds for sale, unless a gemmological report disclosing the type of treatment has been obtained from an internationally recognised Gemmological Laboratory, and stated within the item description. Diamond grades for colour and clarity, where printed in the catalogues are intended as guides for prospective purchasers, with the given limitations of mounts and settings, and are not guaranteed by us. Statements in the catalogue regarding the condition of lots in this sale may appear in the description, however, the absence of such a reference does not imply that a lot is in a perfect or near perfect condition, or completely free from wear or imperfections.
14. We will be pleased to offer Condition Reports to interested clients for lots with estimates of €100 or more. Notwithstanding this reports or any discussion concerning condition of a lot, all lots are offered and sold "As is" as per the conditions of sale printed in the catalogue.
15. These terms are subject to change without notice.
