10. Purchasers are advised that whilst great care has been taken in the examination of gemstones, it is not possible to test every gemstone in multi-gemstone lots. Coloured Gemstones Historically, many coloured gemstones have been subjected to a variety of treatments designed to enhance their appearance. Certain enhancement methods, such as heating, are routinely used to improve colour or transparency in rubies & sapphires. Other methods, such as oiling, enhance the clarity of emeralds. Other coloured gemstones may have undergone other permanent or semipermanent treatments, such as dyeing, irradiation, coating & impregnation, possibly requiring further re-treatment in order to retain their appearance. Prospective purchasers should assume that all gemstones will have been treated unless statements are made to the contrary. Gemmological reports from internationally recognised Gemmological Laboratories will be noted in the item description where available. Diamonds Recent advancements in technology have led to some diamonds being treated in a number of ways, all designed to improve their appearance or alter colour. These processes include fracture filling, laser drilling, a combination of drilling & filling, HPHT, irradiation & various coatings. Buyers are also alerted to the fact that synthetic (laboratory created) diamonds & gemstones, notably in small (melee) sizes are now produced in large quantities. Whilst every effort is made to identify or disclose treated & synthetic goods, it is not possible for us to guarantee that all diamond or gem stones set lots do not contain such material. We do not knowingly offer treated diamonds for sale, unless a gemmological report disclosing the type of treatment has been obtained from an internationally recognised Gemmological Laboratory. Diamond grades for colour & clarity where printed in the catalogues are intended as guides for prospective purchasers, with the given limitations of mounts & settings, & are not guaranteed by us. Statements in the catalogue regarding the condition of lots in this sale may appear in the description, however, the absence of such a reference does not imply that a lot is in a perfect or near perfect condition, or completely free from wear or imperfections. Estimated Weights: If the weight of the stone(s) is stated to be estimated stone(s) has been assessed by us within its/their settings, & the stated weight is a statement of our opinion only. (11A)In the event that we has been given or has obtained certificates for any Lot in the Sale these certificates will be disclosed in the catalogue. Bidders should assume that the gemstones may have been treated. Neither we nor the Seller accepts any liability for contradictions or differing certificates obtained by Buyers on any Lots subsequent to the Sale.
11. Condition Reports are available to clients for lots. Notwithstanding this reports or any discussion concerning condition of a lot, all lots are offered & sold "As is" as per the conditions of sale printed in the catalogue. These terms are subject to change without notice.
